

Walter P. Saraniecki, MS, LDN, LEHP, REHS/RS is the co-founder of

The Saraniecki Institute for Nutrition and Environmental Health, Inc. and the developer and trainer for the RS & REHS Exam Review Class. Walter edits the 450+ page workbook tirelessly and continuously and you will receive the newest edition of this valuable text.

What some students have said:

I was one of your students at the Madison class and I took my exam last week and got a 770 score. My only weak area was in "Promoting Environmental Public Health Awareness" as I did not have any study material on that. Thank you for your help with the class and study material for me to get this done. It is a load off my mind now. Thanks, D

"Thank you again for such a wonderful program-I had a great time! Of course the content was incredible and will make all the difference in passing the exam, but your gift for teaching is what makes the course so effective." K.W. from Chicago, IL

"Hi, Walter/ Claudia, I attended your training session last month and took your advice: I scheduled my NEHA REHS/RS exam as soon as possible. I took the exam today and PASSED! I have been 'away' from Environmental Health for nearly 20 years, and could not have passed this examination without your class and text materials. The workshop, materials, everything were truly top-notch. Thank-you so much! I am re-entering Environmental Health with a new job! Hope you and your family have a great Thanksgiving. I will certainly recommend your course!" J.M. Columbus Ohio

"We were so cold in that classroom, but Walter kept the pace up, which was great, because we actually got through all the material in his workbook.... I didn't know where to begin studying and this class really pulled all the subjects together for me." T.L. from the Tucson NEHA AEC

"My job only requires me to be knowledgeable in Food and Dairy Sanitation. And I am panicked about the test requirements in all the other subjects, especially Septic Tanks, Pools and Vectors of Diseases. Walter focused on what we need for the exam, and I feel more prepared after the class. Glad I got through it and will recommend it to others" M.P. from Ohio

"Cost me money and my time, but I would never have studied without this help from Walter and his book. Worth it." M.K. IL
